

Help Needed

for a research study on the
DEVELOPMENT OF *SPEECH*
PRODUCTION

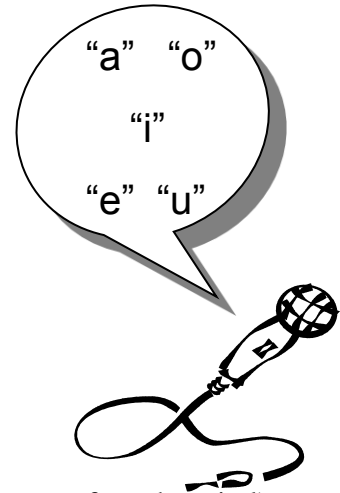

WHO CAN PARTICIPATE?

- One or more of the following:
 - Infants
 - Children with typical development
 - Age 1 and 2

WHAT DOES THE STUDY ENTAIL?

- **Recording** your voice while you speak into a microphone and repeat various sounds, words, and sentences.
- A brief **hearing screening**.
- The session takes about **30-45 minutes**, depending on age.
- Following completion, you may be eligible for an **additional 30-minute study**. This requires you to breathe slowly into a tube that measures the size and shape of your mouth and throat.
- **Some individuals may be eligible to participate in this study again in the future!**

Compensation for participating
